

jQuery Fundamentals Lab 2

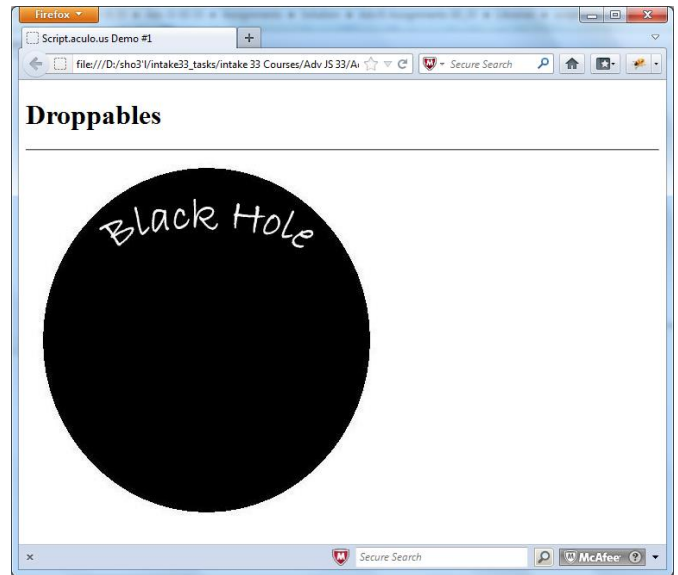

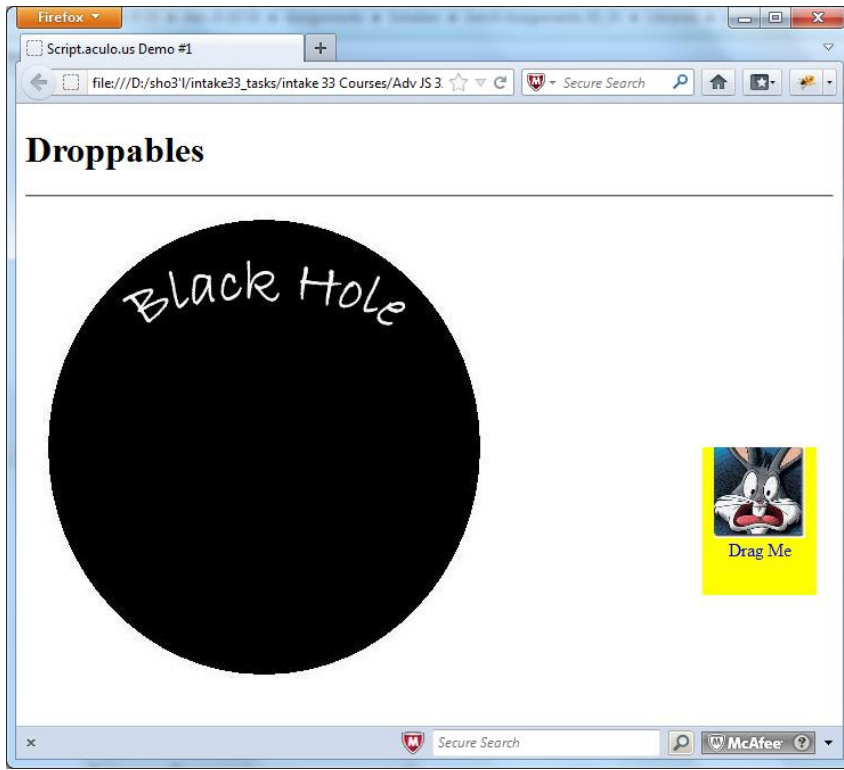

1. Set the div style to have color, width of 100px, solid border and color; then apply animation when clicking on run button to change its style to have larger width, triple font size, thicker border width, different background color with noticeable left margin as shown in figure below

2. Scale & Rotate animation

3. Draggable & Droppable Interaction

4. Update your cookie.js file to be a library with \$c namespace, implement its .noConflict() and generate its minified version via any online minifying tool.
